Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 16, 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Chu, US 4,440,672.

Chu discloses photochromic articles (material) comprising at least a photochromic compound, a UV stabilizer and one of optical plastics, sunglass lens, etc. See summary of the invention and claims 10, 25-26. Applicant should be aware that patentability of product-by-process claim is based on the product itself. Though, claim 16, 19 are limited and defined by their process of making, the products are unpatentable if they are the same or obvious from the product of a prior art. *In re Thorpe*, 227 USPQ 964 (CAFC, 1985). See also *Ex parte Gray*, 10 USPQ 2d 1922.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chu, US 4,440,672.

Applicant claims photochromic optical material obtained by dispersing in high molecular matrix having Rockwell hardness of 80-120.

Determination of the scope and content of the prior art (MPEP §2141.01)

Chu teaches photochromic articles (material) comprising at least a photochromic compound, a UV stabilizer and one of optical plastics, sunglass lens, etc.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the instant invention and that of Chu is that applicant claims the optical material is obtained by dispersing in high molecular matrix having Rockwell hardness of 80-120 while Chu does not disclose the physical property of the optical material.

Finding of prima facie obviousness---rational and motivation (MPEP §2142.2413)

However, disclosing the physical property of a known material does not make the material novel. It is a mere characterization, which in and of itself is not patentable significant.

Therefore, the instant invention is prima facie obvious from the teaching of Chu. One of ordinary skill in the art would have known to add the physical property of the material at the time the invention was made. The motivation is from the teaching by Chu and to get around it.

Specification

The disclosure is objected to because of the following informalities: it is not in US format.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).
